Press Release 05/2026

Neustadt-Fernthal, March 2026

BOY draws a positive conclusion following the successful MECSPE 2026 in Bologna

Dr. Boy GmbH & Co. KG, together with its Italian distribution partner ST.A.TE Technologies, looks back on a successful participation at MECSPE 2026 in Bologna. From 4 to 6 March, ST.A.TE presented the BOY 80 *Electric* electromechanical injection moulding machine in Hall 36 at the booth E17, attracting considerable interest from trade visitors.

During the trade fair, the BOY 80 *Electric* demonstrated its capabilities in the live production of blood filters for the medical technology sector. The application impressively highlighted the advantages of the electromechanical injection moulding machine: cycle time optimisation through parallel motion, a highly dynamic injection process, high repeatability, precise motion sequences, and stable, clean production under demanding conditions. In particular, the combination of an energy-efficient drive concept, simultaneous movements and an electric ejector impressed numerous visitors.

Francesco Valsecchi of ST.A.TE Technologies sums up:

“MECSPE was a very successful trade fair for us. The BOY 80 *Electric* attracted a great deal of interest. Overall, many companies visited our booth and we were able to draw up a good number of quotations. Many of the visitors came from central and southern Italy.”

The positive response confirms the growing interest in energy-efficient, electro-mechanical injection moulding solutions in the Italian market. BOY and ST.A.TE Technol-

Spritzgiessautomaten

ogies see this as a solid foundation for further expanding their collaboration with existing customers and initiating new projects in Italy.

Company profile

Dr. BOY GmbH & Co.KG is a leading global manufacturer of injection moulding machines with clamping forces up to 1,250 kN. These highly compact, durable machines operate with precision, are energy-efficient and therefore extremely economical. With its innovative concepts and solutions, BOY continues to prove itself as a trendsetter. Automation, digitalisation, sustainability and CO₂ reduction are particular areas of focus. Since the company was founded in 1968, over 55,000 injection moulding machines have been delivered to customers on every continent. The owner-managed company is consistently committed to engineering excellence and quality workmanship 'Made in Germany'. For more information visit www.dr-boy.de
